

ENVIRO-CLEAN EQUIPMENT

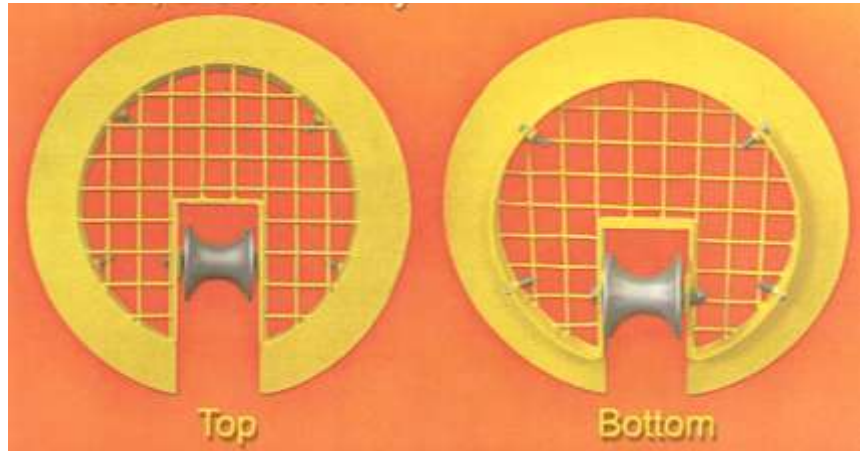

MANHOLE EQUIPMENT

Safety Manhole Cover with 5" Roller

MANHOLE EQUIPMENT

To be used in a Manhole cover frame with an inside ring diameter up to 26".

- Wire mesh provides visibility into the manhole.
- Inner ring adjusting bolts allow a tight fit to avoid slippage.
- **Powder painted "Safety Yellow"** for longer wear, life & visibility.
- Easily used with nozzles.

UEMSI Part #: D0-6MRF
 Approximate Weight: 38 lbs.
 Inner Ring OD – 20.0"
 Outer Ring OD – 28.0"

Think Safety! Safety! Safety!

Manhole Cover Hooks

The manhole cover hooks are heat-treated construction and are available in two different styles.

Part Number	Description	Weight
J1-0G	200 Green Tablets	.75 lbs
J1-0R	200 Red Tablets	.75 lbs
J2-1G	1 lb Green Powder	1.1 lbs
J2-5G	5 lbs Green Powder	5.2 lbs

Part Number	Size	Description	Weight
MHH-918	18"	90° Handle Hook (A)	2.6 lbs
MHH-930	30"	90° Handle Hook (A)	3.7 lbs
MHH-18	18"	Flat Hook (B)	3.7 lbs
MHH-26	26½"	Flat Hook (B)	4 lbs
	"		
MHH-36	36"	Flat Hook (B)	5 lbs

ENVIRO-CLEAN EQUIPMENT

Designed to control the washing ball's travel and to keep your cable from undue wear, the manhole winch and jacks are a wise investment.

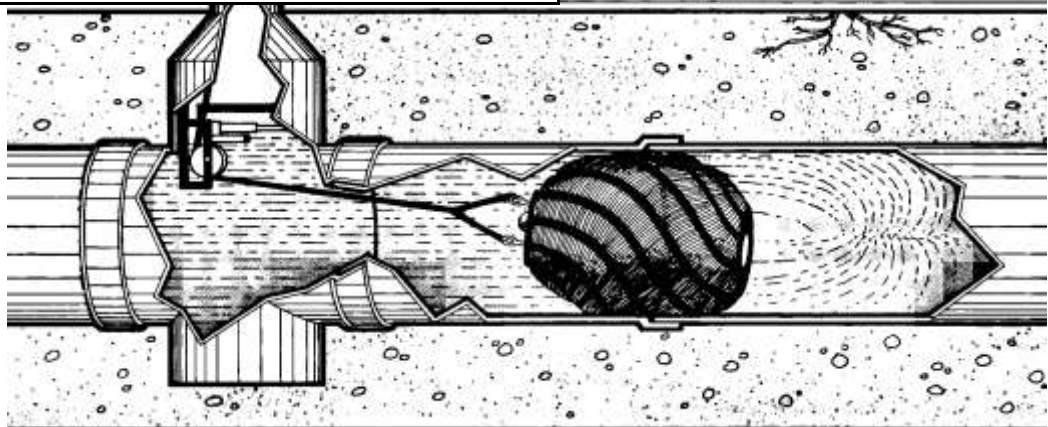

Manhole Jack

All steel welded construction with hydraulic jack, the manhole jack is constructed to fit in the bottom riser just above the top of the pipe being worked on. The pulley is made from high density polyurethane that is rock hard and impervious to the sewer environment. The jack is designed to clear the cable or hoses from the edges of the pipe and riser so as to provide clear travel for the plug or washing ball.

Manhole Winch

Designed specifically for working through the manhole from grade to provide the controllability and safety needed in today's work environment. All steel welded construction provides the strength and durability needs for a winch of this type. The precision counter lets you know exactly where your plug or washing ball is at all times. The plastic coated aircraft-type cable remains flexible and travels through pulleys with a minimum of drag, thus making the job easier and faster.

Part Number	Description
500-00-0	Manhole Jack with Spool
501-00-0	Spool Assy. for Manhole Jack
510-00-0	Manhole Winch w/ Cable 600' 3/16" Plastic
511-00-0	Manhole Winch w/ Cable & Footage Counter
512-00-0	Footage Counter for Manhole Winch
